

Company C Compared to Nutronix. By and Independent Distributor. (Get ready for \$138 autoship plus shipping and rising to \$400/per month.)

Nutronix significantly beats the few products of Company C as well as the pay plan.

Company C has a unilevel that pay 10% of CV or 5% of Dollars on the weak side. This is like getting 2.5% of weak and strong side based on dollars.

In our 2x15 with no balancing we pay 4% (to 8% with overlapping profit centers.) of dollars in the 2x15 (up to over \$327,000 per month in each profit center). We also pay 9 levels of infinity from level 7 to infinity. In nutronix we get fully paid for Excess purchases over the \$90 autioship and monthly specials with no MLM markup. This is paid 5% to 10% in the 9 level compressible unilevel with 10% infinity bonus. (more on this later.)

This is considerably more income without losing out on a "run away" leg. In Nutronix we get fully paid (4% of all volume to infinity for practical purposes) on the strong side even if the other side has no one in it. Eventually in Company C you need \$157,000 per month under one person in each lag to pick up the 7th level match.

On fast start (\$138 purchase) Company C pays \$15 to the sponsor \$5 to sponsor's sponsor . Or on Selling the \$669 Super Achiever pack they pay \$100 and \$50 and it is worth \$350 cv. On the Diamond pack \$900 purchase they pay \$225 and \$50 and 350 cv. This does not repeat annually. They encourage you to front load yourself with \$900 Double diamond pack to get paid deeper in the "matching unilevel without the requirement to build a team.

On the \$90 Gold pack, Nutronix pays \$60 on first 2 of first 2 to infinity under all coded legs paid weekly and repeating annually. This one bonus is more money than all of the Company C compensation plan. A 2x12 pay \$480,000 per year.

The Company C unilevel is difficult to get 6 levels deep unless you front load yourself. It takes about 1,100 people on autoship to get 10% match of real dollars on weak side on personal sponsored and 3 to 5 % of the Company C 5 levels deep of unilevel. (1.5% to 2.5% of total dollars). Eventually in Company C you need \$157,000 per month under one person in each lag to pick up the 7th level match. This is a "Diamond in each leg."

In the Nutronix 2x15 matrix you only need 2 to get the maximum match, not 1,100. This is in effect a 100% match of personal sponsored people (not 10%) and 50% match of those sponsored by others 5 levels deep in both the Matrix and Unilevel. (not 1.5% to 2.5%) .

Nutronix has a massive unilevel building because everyone has great incentive to start 10s and 100s of coded \$60 legs. This has never been seen in networking.

The drive to have coded legs builds a massive unilevel which pays 9 compressed levels plus a 10% infinity bonus on excess product purchases.

To help families afford the great products at deep discount, at the Gold \$90 per month level, there are several of the best products at 50% discount. No MLM Markup is paid. This is very rear in networking.

Company C does not do this.
