

# The Power of Two.

If we involve people in a straight line and we each involve only one and that person involves one the next day and that one involves on the next day then it would take over 6 billion (6000 million days or 16.44 million years to involve each person on earth. People would die and we would be telling there great great great , a million greats away grand children).

If we involve 2 in day one and they each involve 2 the next day then there would be 4. As each day goes by the number doubles. In just 33 days or doublings we would involve over 8 Billion people, not 16.44 million years.

This is the principle of networking. 2 who get 2. We have a very good system to do this and many people will become wealthy as this process continues. When a company translates the 2x people into a unilevel the 6x or higher numbers are possible.

You can be a part of history.

Weeks	2x	3x	4x	5x	6x
1	2	3	4	5	6
2	4	9	16	25	36
3	8	27	64	125	216
4	16	81	256	625	1,296
